WORDPRESS THEME

TIMELINE

THE GUIDE

Timeline WordPress Theme was ideated and designed by **JuliusDesign** ispired by **Timeline Facebook** based on **Twenty Eleven 1.2** proudly powered by **WordPress**.

JuliusDesign is the blog of Giuliano Ambrosio, Italian web designer freelence, one of the most popular blogs in Italy on the web and design.

This theme is intended to be an experiment, a challenge with the aim to show how powerful it is WordPress.

The layout is likely to be patented by Facebook timeline, so you should only use it for study and not for commercial use.

Download the latest version of Timeline.

Extract the ZIP contents of the present version of the theme.

Upload in your FTP the folder timeline/ in folder wp-content/theme/ and you must activate the theme by administrator panel.
